

National Medical and Treatment Audit Diagnosis Allocation

Optimize commercial effectiveness with insights into the patterns and treatment of disease encountered in the United States

National Medical and Treatment Audit (NMTA)

Offering detailed insights about the patterns and treatment of disease encountered by non-institutional providers within the United States to make more informed decisions on market opportunities, targeting, forecasting, and competitive treatments.

Diagnosis allocation add-on module

Allocation of NSP and NPA information across disease state by diagnosis.

 DISEASE AND TREATMENT ASSESSMENT	• ICD-10 diagnosis classification • Identify telehealth vs. in-person treatments • Track multi-indication products by usage and capture off-label use
 PLANNING AND FORECASTING	• Develop and evaluate market entry strategies • Understand brand profiles by diagnosis, prescriber, and patient profiles
 COMPETITIVE ASSESSMENT	• Understand which products are used for specific diagnoses and if this changes over time • Identify new therapeutic categories • Identify competitors for each diagnosis
 CATEGORIZING AND PROFILING	• Determine which specialties are the most important • Profile patient and physician demographics
 EVALUATE MARKET OPPORTUNITY	• Size and characterize the target market based on disease and treatment patterns • Determine the appropriate areas for long-term research and/or short-term development

Features and benefits

Key data elements and measures

Advantages in coverage, granularity, and reporting lead to improved insights and confidence

- IQVIA's delivery of the new offering based on actual professional medical claims and pharmacy claims increases client confidence.
- IQVIA's National Medical and Treatment Audit will include unique data attributes, leading to improved insights.
- IQVIA's National Medical and Treatment Audit will offer the ability to report medical data to over 60 group specialties for more actionable intelligence.

IQVIA continues to be at the leading edge of providing medical insights and, with the launch of NMTA, IQVIA looks forward to providing customers with views of today's therapeutic markets with more confidence.

Integrated on SMART

With IQVIA's NMTA launched on SMART, customers will benefit from the power of a business intelligence platform, coupled with access to national-level core prescription and sales databases, to realize a rich framework of insights into the impact of patterns and treatment of disease on brand performance.
